

Akshay Patwari

SOFTWARE ENGINEER

Bengaluru, India | +91 91642 91810 | akshaypatwariap@gmail.com

LinkedIn: <https://www.linkedin.com/in/akshaypatwari/> | Portfolio: <https://akshaypatwari.me/>

Objective

Experienced Java developer with **8+ years** of expertise in building scalable, **microservices-based applications** for banking, insurance, and AI platform domains. Strong hands-on proficiency in **Java/J2EE, Spring Boot 3, REST APIs, OOP concepts, enterprise design patterns, and SOA principles**, with a consistent track record of delivering production-grade solutions across the full SDLC. Practiced in **CI/CD tooling (Jenkins, Maven, Git), unit testing with JUnit, and Agile development** in large, collaborative engineering teams. Brings direct **banking domain experience** from Oracle Financial Services (Flexcube core banking) and a background leading six-engineer teams to deliver high-quality software on time — well-suited to JPMorgan Chase's engineering standards and pace.

Skills

- **Programming Languages:** Java 8-21, Angular 17
- **Frameworks:** Microservices, Spring Boot 3, Spring JPA
- **Tools & Platforms:** Git, SVN, Jira, Keycloak, NiFi, Docker, Nexus, RabbitMQ/Kafka, Redis, Agile, CI/CD (Jenkins)
- **Databases:** MySQL, Oracle, MongoDB
- **Interpersonal:** Leadership, Problem Solving, Decision Making, Communication across geographies
- **Others:** GenAI/LLM (LangChain, LangGraph)

Professional Experience

Samsung Electro-Mechanics — Software Engineer (CL3) / Staff Engineer

February 2022 – Present

PADO Platform

- Developed and deployed scalable **Java 21 / Spring Boot 3 microservices** applying strong **OOP concepts, SOA principles, and enterprise design patterns** — following full SDLC disciplines from design through production release, with proper **unit-test validation (JUnit)** and structured code reviews across the team.
- Leveraged **Kubernetes** orchestration to efficiently manage containerised applications, ensuring high resource utilisation, scalability, and resilience across diverse deployment environments, facilitating seamless application scaling and high availability.
- Implemented robust **Single Sign-On (SSO)** from Knox Portal (internal Samsung EMP) using **Keycloak** for all user-related actions (token, session, etc.), integrating securely with internal systems and third-party tools such as Kubeflow, Grafana, Jupyter notebooks, and Docker — enhancing security and user convenience.
- As **technical team leader, managed six developers** — overseeing projects involving design (architecting features), code reviewing, and ensuring client satisfaction through effective communication and problem-solving across large, collaborative teams in an Agile environment.
- Enforced full **CI/CD pipeline discipline (Jenkins, Maven, Git, Docker)** — build, test, and deploy automation across environments — aligned to industry best practices for continuous integration and delivery.
- Leveraging an **in-house-developed LLM** in day-to-day work, including hosting the LLM in the platform.
- Deploying, maintaining, and debugging production code following the organisation's process structure with proper unit-test case validation.

Oracle Financial Services Software Ltd — Technical Staff Consultant

August 2021 – February 2022

- Developer on the **Flexcube** application (banking). Module-wise code analysis and building **PL/SQL** packages, functions, and procedures.
- Developed data-based fixes in production with PL/SQL cursors and SQL queries.

Chubb International (Cognizant) — Programmer Analyst

February 2019 – August 2021

- Developer on the **Masterpiece Application** (Policy Builder Tool); delivered client-required changes with clean execution and technical depth across the full SDLC.
- Developed an additional feature (efficient walk-back handling code) required by the business, and suggested innovative improvements and future fixes.

Agrainz Solutions — Trainee Software Engineer

February 2018 – August 2018

- Intern on two products: Agrainz and Zedua.

Education

MVJ College of Engineering — Information Science and Engineering, 2017

Achievements

- **Leading a team of 6 Java developers (January 2024 – Present):** Java technical lead and associate team lead within the organisation, ensuring project milestones were met while maintaining high quality standards.
- **CSR event — training on latest technologies:** taught higher-secondary students about the latest technologies in the software industry.

Awards

- **Best Trainer in Java (February 2023 – December 2024):** recognised for conducting technical trainings within technical teams in the organisation.
- **"Doing the Right Thing, the Right Way" (December 2020):** awarded at Cognizant for constant client interaction and implementing necessary changes and suggestions.
