OBJECTIVE

Java engineer with **8+ years** of experience designing and shipping **high-scale, high-performance, fault-tolerant distributed systems** across AI, insurance, and banking domains. Proficient in **Java 8-21, Spring Boot 3, microservices architecture, REST API implementation, and cloud-native deployments on Kubernetes**, with hands-on depth in **relational (MySQL, Oracle) and NoSQL (MongoDB) databases, schema design, and query optimization**. Brings strong OOP and design-pattern discipline, a commitment to testable and maintainable code, and a track record of **leading and mentoring teams of engineers** through complex architectural decisions. Eager to apply this background to build the next generation of enterprise-scale backend services at Apple.

SKILLS

- **Programming Languages:** Java 8-21, Angular 17
 - **Frameworks:** Microservices, Spring Boot 3, Spring JPA
 - **Tools & Platforms:** Git, Jira, Keycloak, NiFi, Docker, Nexus, RabbitMQ/Kafka, Redis, Agile, CI/CD (Jenkins)
 - **Databases:** MySQL, Oracle, MongoDB
 - **Interpersonal:** Leadership, Problem Solving, Decision Making, Communication across geographies
 - **Others:** GenAI/LLM (LangChain, LangGraph)
-

PROFESSIONAL EXPERIENCE

Samsung Electro-Mechanics — Software Engineer (CL3) / Staff Engineer

02/2022 – Present

PADO Platform — high-availability distributed Java backend on Kubernetes

- Architected and delivered **fault-tolerant microservices in Java / Spring Boot 3** on **Kubernetes** — implementing the "build in one cluster, deploy to many" model with external PV mounting — achieving high resource utilization, scalability, and resilience at production scale.
- Designed and implemented **REST APIs and event-driven integrations** using **Kafka/RabbitMQ** and **Redis** for caching and distributed state; model-drift events trigger automated redeployment pipelines, reducing operational downtime.
- Applied **OOP principles, GoF design patterns, and Spring JPA** to build testable, maintainable, and extensible backend services; enforced code quality through rigorous code review and unit-test validation within org CI/CD (Jenkins) process structure.
- As **technical team leader for six engineers** — drove feature architecture, design reviews, estimation, and cross-functional stakeholder communication, delivering milestones on time.
- Built the platform's **identity and access layer using Keycloak (SSO, OAuth2/OIDC)**, securing REST API access across Kubeflow, Grafana, Jupyter, and Docker integrations.
- Integrated an **in-house LLM** into the platform (hosting and orchestration), extending developer tooling with AI-assisted capabilities.

Oracle Financial Services Software Ltd — Technical Staff Consultant

08/2021 – 02/2022

- Developer on the **Flexcube** core banking platform — module-wise code analysis and building **PL/SQL** packages, functions, and procedures; production data fixes with cursors and SQL query optimization.

Chubb International (Cognizant) — Programmer Analyst

02/2019 – 08/2021

- Developer on the **Masterpiece** policy-builder application; delivered client-required changes with clean execution, built an efficient walk-back handling feature, and proposed future architectural improvements.

Agrainz Solutions — Trainee Software Engineer

02/2018 – 08/2018

- Intern on two products: Agrainz and Zedua.
-

EDUCATION

MVJ College of Engineering — Information Science and Engineering, 2017

ACHIEVEMENTS

- **Leading a team of 6 Java developers (01/2024 – Present):** Java technical lead and associate team lead within the organization, ensuring project milestones were met while maintaining high quality standards.
 - **CSR event — training on latest technologies:** taught higher-secondary students about the latest technologies in the software industry.
-

AWARDS

- **Best Trainer in Java (02/2023 – 12/2024):** recognized for conducting technical trainings within technical teams in the organization.
- **"Doing the Right Thing, the Right Way" (12/2020):** awarded at Cognizant for constant client interaction and implementing necessary changes and suggestions.
