

Akshay Patwari

STAFF SOFTWARE ENGINEER

Bengaluru, India | +91 91642 91810 | akshaypatwariap@gmail.com | [linkedin.com/in/akshaypatwari](https://www.linkedin.com/in/akshaypatwari) | akshaypatwari.me

OBJECTIVE

Staff-level Java engineer with **8+ years** building scalable, distributed platforms and microservices across insurance, banking, and AI. Experienced in API-driven service design, message brokers and pub/sub (Kafka/RabbitMQ), caching (Redis), and identity/access governance (Keycloak, OAuth2/OIDC) on Kubernetes, with a focus on high availability, observability, and developer experience. Passionate about standardizing and governing platform APIs and applying AI/LLM orchestration (LangChain/LangGraph) to amplify platform automation.

SKILLS

Programming Languages: Java 8–21, Angular 17

Frameworks: Microservices, Spring Boot 3, Spring JPA

Tools & Platforms: Git, Jira, Keycloak, NiFi, Docker, Nexus, RabbitMQ/Kafka, Redis, Agile, CI/CD (Jenkins)

Databases: MySQL, Oracle, MongoDB

Interpersonal: Leadership, Problem Solving, Decision Making, Communication across geographies

Others: GenAI/LLM (LangChain, LangGraph)

PROFESSIONAL EXPERIENCE

Samsung Electro-Mechanics — Software Engineer (CL3) / Staff Engineer

02/2022 – Present

PADO Platform — a scalable, multi-tenant MLOps & AI developer platform

- Architected and delivered **microservices (Spring Boot 3) on Kubernetes** as a self-service platform (“build once, deploy to many clusters,” external PV mounting), ensuring high availability, scalability, and resilience.
- Designed **event-driven pipelines** with **Kafka/RabbitMQ** and **Redis** caching; model-drift detection emits events that trigger automated redeployment, improving workflows and reducing downtime.
- Built the platform’s **identity & access layer with Keycloak (SSO, OAuth2/OIDC)** — one governed front door and secure API integration across Kubeflow, Grafana, Jupyter, and Docker.
- Owned **API/service contracts and integrations** across internal tools, plus production deployment, monitoring, and debugging with unit-test validation.
- Integrated an **in-house LLM** into developer workflows (hosting + orchestration), exploring AI-assisted platform automation.
- **Technical team leader for six engineers** — feature architecture, design/code reviews, and cross-geography stakeholder communication.

Oracle Financial Services Software Ltd — Technical Staff Consultant

08/2021 – 02/2022

- Developer on the **Flexcube** banking platform — module-wise code analysis and building **PL/SQL** packages, functions, and procedures; production data fixes with cursors and SQL.

Chubb International (Cognizant) — Programmer Analyst

02/2019 – 08/2021

- Developer on the **Masterpiece** policy-builder application; delivered client-required changes and built an efficient walk-back handling feature with improvement suggestions.

Agrainz Solutions — Trainee Software Engineer

02/2018 – 08/2018

- Intern on two products: Agrainz and Zedua.

EDUCATION

MVJ College of Engineering — Information Science and Engineering, 2017

ACHIEVEMENTS

- **Leading a team of 6 Java developers (01/2024 – Present):** Java technical lead / associate team lead ensuring milestones were met while maintaining high quality standards.
- **CSR event — training on latest technologies:** taught higher-secondary students about the latest technologies in the software industry.

AWARDS

- **Best Trainer in Java (02/2023 – 12/2024):** recognized for conducting technical trainings within technical teams.
- **“Doing the Right Thing, the Right Way” (12/2020):** awarded at Cognizant for constant client interaction and implementing necessary changes and suggestions.
