

Akshay Patwari

STAFF SOFTWARE ENGINEER

Bengaluru, India | +91 91642 91810 | akshaypatwariap@gmail.com | [linkedin.com/in/akshaypatwari](https://www.linkedin.com/in/akshaypatwari) | akshaypatwari.me

OBJECTIVE

Staff-level Java engineer with **8+ years** designing and building scalable, fault-tolerant distributed systems and microservices for regulated domains (banking, insurance) and AI platforms. Strong in Java/Spring, event-driven architectures (Kafka/RabbitMQ), distributed caching (Redis), REST APIs with OAuth-based security, and CI/CD — with hands-on LLM integration and serving at scale and AI-assisted development. Eager to deliver secure, high-quality, high-availability fintech solutions at Visa's transaction scale.

SKILLS

Programming Languages: Java 8–21, Angular 17

Frameworks: Microservices, Spring Boot 3, Spring JPA

Tools & Platforms: Git, Jira, Keycloak, NiFi, Docker, Nexus, RabbitMQ/Kafka, Redis, Agile, CI/CD (Jenkins)

Databases: MySQL, Oracle, MongoDB

Interpersonal: Leadership, Problem Solving, Decision Making, Communication across geographies

Others: GenAI/LLM (LangChain, LangGraph)

PROFESSIONAL EXPERIENCE

Samsung Electro-Mechanics — Software Engineer (CL3) / Staff Engineer

02/2022 – Present

PADO Platform — a scalable, multi-tenant MLOps & AI developer platform

- Designed and built **scalable microservices (Java, Spring Boot 3) on Kubernetes** for a multi-tenant platform — **high availability, fault tolerance, and resilience** (“build once, deploy to many clusters,” external PV mounting).
- Engineered **event-driven, distributed pipelines** with **Kafka/RabbitMQ** and **Redis caching**; model-drift events trigger automated redeployment — real-time processing and reduced downtime.
- Implemented secure **REST API integration and identity with Keycloak (SSO, OAuth2/OIDC)** across Kubeflow, Grafana, Jupyter, and Docker.
- Established **observability/monitoring (Grafana)** and production **incident debugging** with unit-test validation, following org process and quality standards.
- Integrated and **hosted an in-house LLM (serving at scale)** with LangChain/LangGraph, and applied **AI-assisted development** in daily engineering workflows.
- Technical team leader for six engineers** — feature architecture, **design and code reviews**, code quality, and cross-geography stakeholder communication.

Oracle Financial Services Software Ltd — Technical Staff Consultant

08/2021 – 02/2022

- Developer on the **Flexcube** core banking (fintech) platform — module-wise code analysis and building **PL/SQL** packages, functions, and procedures; production data fixes with cursors and SQL over relational datastores.

Chubb International (Cognizant) — Programmer Analyst

02/2019 – 08/2021

- Developer on the **Masterpiece** policy-builder application; delivered client-required changes and built an efficient walk-back handling feature with improvement suggestions.

Agrainz Solutions — Trainee Software Engineer

02/2018 – 08/2018

- Intern on two products: Agrainz and Zedua.

EDUCATION

MVJ College of Engineering — Information Science and Engineering, 2017

ACHIEVEMENTS

- Leading a team of 6 Java developers (01/2024 – Present):** Java technical lead / associate team lead ensuring milestones were met while maintaining high quality standards.
- CSR event — training on latest technologies:** taught higher-secondary students about the latest technologies in the software industry.

AWARDS

- Best Trainer in Java (02/2023 – 12/2024):** recognized for conducting technical trainings within technical teams.
- “Doing the Right Thing, the Right Way” (12/2020):** awarded at Cognizant for constant client interaction and implementing necessary changes and suggestions.
