

Akshay Patwari

STAFF SOFTWARE ENGINEER

Bengaluru, India | +91 91642 91810 | akshaypatwari@gmail.com | [linkedin.com/in/akshaypatwari](https://www.linkedin.com/in/akshaypatwari) | akshaypatwari.me

OBJECTIVE

Staff engineer with **8+ years** of strong software-engineering fundamentals and, over the last ~3 years, hands-on **Generative AI / LLM application** work. Experienced integrating and hosting LLMs at scale, building AI orchestration and assistants with LangChain/LangGraph, and delivering REST microservices on Docker/Kubernetes with CI/CD. Strong in software design, architecture, and mentoring — focused on reliable, secure, high-performing GenAI solutions built to enterprise best practices.

SKILLS

Programming Languages: Java 8–21, Angular 17

Frameworks: Microservices, Spring Boot 3, Spring JPA

Tools & Platforms: Git, Jira, Keycloak, NiFi, Docker, Nexus, RabbitMQ/Kafka, Redis, Agile, CI/CD (Jenkins)

Databases: MySQL, Oracle, MongoDB

Interpersonal: Leadership, Problem Solving, Decision Making, Communication across geographies

Others: GenAI/LLM (LangChain, LangGraph)

PROFESSIONAL EXPERIENCE

Samsung Electro-Mechanics — Software Engineer (CL3) / Staff Engineer

02/2022 – Present

PADO Platform — a scalable, multi-tenant MLOps & AI developer platform

- **Integrated and hosted an in-house LLM (serving at scale)** and built **AI orchestration and intelligent workflows with LangChain/LangGraph**, applying AI-assisted development across daily engineering.
- Designed and delivered **REST microservices (Spring Boot 3)** on **Kubernetes/Docker** to support AI applications — high availability, scalability, and resilience (“build once, deploy to many clusters”).
- Owned the **AI model lifecycle** — training, deployment, monitoring, and **automated redeployment on drift** — improving reliability and reducing downtime (foundation for model evaluation and guardrails).
- Built the platform’s **identity & access layer with Keycloak (SSO, OAuth2/OIDC)** and secure API integration across Kubeflow, Grafana, Jupyter, and Docker.
- Applied **event-driven design** (Kafka/RabbitMQ) and **Redis** caching to optimize performance and latency; established observability with Grafana.
- **Mentored and led six engineers** — architecture and **code reviews**, engineering best practices, and cross-geography collaboration.

Oracle Financial Services Software Ltd — Technical Staff Consultant

08/2021 – 02/2022

- Developer on the **Flexcube** banking platform — module-wise code analysis and building **PL/SQL** packages, functions, and procedures; production data fixes with cursors and SQL.

Chubb International (Cognizant) — Programmer Analyst

02/2019 – 08/2021

- Developer on the **Masterpiece** policy-builder application; delivered client-required changes and built an efficient walk-back handling feature with improvement suggestions.

Agrainz Solutions — Trainee Software Engineer

02/2018 – 08/2018

- Intern on two products: Agrainz and Zedua.

EDUCATION

MVJ College of Engineering — Information Science and Engineering, 2017

ACHIEVEMENTS

- **Leading a team of 6 Java developers (01/2024 – Present):** Java technical lead / associate team lead ensuring milestones were met while maintaining high quality standards.
- **CSR event — training on latest technologies:** taught higher-secondary students about the latest technologies in the software industry.

AWARDS

- **Best Trainer in Java (02/2023 – 12/2024):** recognized for conducting technical trainings within technical teams.
- **“Doing the Right Thing, the Right Way” (12/2020):** awarded at Cognizant for constant client interaction and implementing necessary changes and suggestions.
