Visa Status: Requires UK Skilled Worker Visa Sponsorship

OBJECTIVE

Java engineer with **8+ years** of expertise delivering **secure, high-quality production code** across financial services (banking, insurance) and AI platforms, with deep proficiency in **Java 8-21**, **Spring Boot 3**, and object-oriented design including multi-threading, concurrency, and memory management. **Strong command of Oracle and MongoDB databases**, microservices architecture, and **event-driven systems (Kafka/RabbitMQ)** deployed on Kubernetes with full CI/CD pipelines. Led a team of six engineers, acting as a technical decision-maker across design, code review, and cross-geography stakeholder communication. Eager to bring domain experience from Oracle Financial Services (Flexcube banking platform) and a track record of delivering resilient, scalable platforms to J.P. Morgan's Prime Finance Services team in London.

SKILLS

- **Programming Languages:** Java 8-21, Angular 17
- **Frameworks:** Microservices, Spring Boot 3, Spring JPA
- **Tools & Platforms:** Git, Jira, Keycloak, NiFi, Docker, Nexus, RabbitMQ/Kafka, Redis, Agile, CI/CD (Jenkins)
- **Databases:** MySQL, Oracle, MongoDB
- **Interpersonal:** Leadership, Problem Solving, Decision Making, Communication across geographies
- **Others:** GenAI/LLM (LangChain, LangGraph)

PROFESSIONAL EXPERIENCE

Samsung Electro-Mechanics — Software Engineer (CL3) / Staff Engineer

February 2022 – Present

PADO Platform — Enterprise MLOps and AI Infrastructure Platform

- Developed and maintained **secure, high-quality production code** using **Java 21** and **Spring Boot 3**, applying OOP design, multi-threading, and memory management best practices to ensure stability and performance under load.
- Designed and delivered **microservices on Kubernetes** with a "build in one cluster, deploy to many" strategy — enabling high availability, horizontal scalability, and resilience across diverse production environments.
- Built **event-driven data pipelines using Kafka/RabbitMQ** for asynchronous processing and model-drift detection, triggering automated redeployment workflows and reducing operational downtime.
- Implemented **Oracle and MongoDB** database layers across multiple services, writing optimised queries, schema designs, and data-migration scripts to support platform reliability.
- Enforced full **CI/CD and SDLC practices (Jenkins, Git, Agile)** — unit-test validation, code reviews, and structured deployment processes — driving engineering quality and release cadence.
- Built the platform's **identity and access management layer using Keycloak (SSO, OAuth2/OIDC)**, securing API integrations across Kubeflow, Grafana, Jupyter, and Docker environments.
- Integrated an **in-house LLM** into developer workflows (hosting and orchestration), applying

emerging AI and machine learning capabilities to amplify platform automation.

- **Technical team leader for six engineers** — owned feature architecture, code reviews, and influencing design decisions; acted as primary escalation point for production incidents and stakeholder communication across geographies.

Oracle Financial Services Software Ltd — Technical Staff Consultant

August 2021 – February 2022

- Developer on the **Flexcube** core banking platform — module-wise code analysis and authoring **PL/SQL** packages, functions, and procedures for financial transaction processing.
- Delivered production data-layer fixes using PL/SQL cursors and optimised SQL queries in an **Oracle** database environment.

Chubb International (Cognizant) — Programmer Analyst

February 2019 – August 2021

- Developer on the **Masterpiece** insurance policy-builder application; delivered client-required changes with clean execution and technical depth across the full SDLC.
- Designed and implemented an efficient walk-back handling feature, improving business process reliability and suggesting further future improvements.

Agrainz Solutions — Trainee Software Engineer

February 2018 – August 2018

- Intern on two products: Agrainz and Zedua.

EDUCATION

MVJ College of Engineering — Information Science and Engineering, 2017

ACHIEVEMENTS

- **Leading a team of 6 Java developers (January 2024 – Present):** Java technical lead and associate team lead within the organisation, ensuring project milestones were met while maintaining high quality standards.
- **CSR event — training on latest technologies:** taught higher-secondary students about the latest technologies in the software industry.

AWARDS

- **Best Trainer in Java (February 2023 – December 2024):** recognised for conducting technical trainings within technical teams in the organisation.
- **"Doing the Right Thing, the Right Way" (December 2020):** awarded at Cognizant for constant client interaction and implementing necessary changes and suggestions.
