OBJECTIVE

Java engineer with **8+ years** of hands-on experience designing, developing, and delivering **scalable, high-performance backend microservices** in agile, cross-functional teams across AI platforms, core banking, and enterprise insurance. Proficient in **Java 8-21 (including Java 17+)**, **Spring Boot 3**, **REST API design and implementation**, **OAuth 2.0 / OpenID Connect / JWT-based security**, and **cloud-native deployment on Kubernetes** with observability via monitoring and logging. Takes **end-to-end ownership** — from architectural decisions and code quality to production deployment and maintenance — while mentoring engineers and aligning solutions with business goals. Eager to contribute to Volvo Group DTO's product-oriented digital transformation as a Senior Software Engineer.

SKILLS

- **Programming Languages:** Java 8-21, Angular 17
 - **Frameworks:** Microservices, Spring Boot 3, Spring JPA
 - **Tools & Platforms:** Git, Jira, Keycloak, NiFi, Docker, Nexus, RabbitMQ/Kafka, Redis, Agile, CI/CD (Jenkins)
 - **Databases:** MySQL, Oracle, MongoDB
 - **Interpersonal:** Leadership, Problem Solving, Decision Making, Communication across geographies
 - **Others:** GenAI/LLM (LangChain, LangGraph)
-

PROFESSIONAL EXPERIENCE

Samsung Electro-Mechanics — Software Engineer (CL3) / Staff Engineer

02/2022 – Present

PADO Platform — end-to-end Java microservices for AI model lifecycle management

- Designed, developed, and maintained **scalable Spring Boot 3 microservices** with clean **REST API** contracts — taking end-to-end ownership across design, development, testing, deployment, and production maintenance within an agile delivery model.
- Built the platform's **identity and security layer using Keycloak (OAuth 2.0, OpenID Connect, JWT)**, providing governed, secure API access across Kubeflow, Grafana, Jupyter, and Docker integrations — directly aligned with enterprise security best practices.
- Implemented **observability** across the platform using **Grafana** for monitoring and logging, enabling proactive detection of model drift and infrastructure issues before they impacted production.
- Leveraged **Kubernetes** for containerized deployment across multiple clusters (Docker, Jenkins CI/CD), implementing the "build once, deploy to many" model with external PV mounting for high availability and resilience.
- Designed **event-driven integrations** with **Kafka/RabbitMQ** and **Redis** for caching and distributed state; applied **JUnit / Mockito** unit testing and rigorous code review to uphold coding standards and reliability.
- As **technical team leader for six engineers** — drove architecture decisions, mentored developers, and communicated effectively with both technical and non-technical stakeholders to align delivery with business priorities.
- Integrated an **in-house LLM** into the platform (hosting and orchestration), extending developer tooling with AI-assisted capabilities.

Oracle Financial Services Software Ltd — Technical Staff Consultant

08/2021 – 02/2022

- Developer on the **Flexcube** core banking platform — module-wise code analysis and building **PL/SQL** packages, functions, and procedures; production data fixes with cursors and SQL query optimization.

Chubb International (Cognizant) — Programmer Analyst

02/2019 – 08/2021

- Developer on the **Masterpiece** policy-builder application; delivered client-required changes with clean execution, built an efficient walk-back handling feature, and proposed future architectural improvements aligned with business needs.

Agrainz Solutions — Trainee Software Engineer

02/2018 – 08/2018

- Intern on two products: Agrainz and Zedua.

EDUCATION

MVJ College of Engineering — Information Science and Engineering, 2017

ACHIEVEMENTS

- **Leading a team of 6 Java developers (01/2024 – Present):** Java technical lead and associate team lead within the organization, ensuring project milestones were met while maintaining high quality standards.
 - **CSR event — training on latest technologies:** taught higher-secondary students about the latest technologies in the software industry.
-

AWARDS

- **Best Trainer in Java (02/2023 – 12/2024):** recognized for conducting technical trainings within technical teams in the organization.
- **"Doing the Right Thing, the Right Way" (12/2020):** awarded at Cognizant for constant client interaction and implementing necessary changes and suggestions.
