## Objective

Experienced Java Full Stack Developer with over **8+ years of expertise** in creating scalable, efficient applications for diverse sectors such as insurance, banking, and artificial intelligence. Skilled in Java, Angular, Kubernetes, and Mlops, with a passion for delivering tailored solutions that meet client needs. Committed to continuous learning and innovative problem-solving to drive project success and technological advancement.

## Skills

- **Programming Languages:** Java 8 to 21, Angular 17
- **Framework:** Microservices, Spring Boot 3, Spring JPA
- **Tools & Platforms:** Git, Jira, Key cloak, Ni-fi, Docker, Nexus, RabbitMQ/Kafka, Redis, Agile, CI/CD(Jenkins)
- **Database Skills:** MySQL, Oracle, Mongo DB
- **Interpersonal Skills:** Leadership, Problem Solving, Decision Making, Communication across geographies.
- **Others:** GenAI/LLM (Lang Chain, Lang graph)

## Professional Experience

### Samsung-Electro Mechanics | Software Engineer – CL 3 | Staff Engineer

02/2022-Present

- Team lead in “**PADO Platform**” Developed and deployed scalable Mops application’s microservices to optimize AI model lifecycle management, including Training, Deployment, Monitoring, and Redeploying based on drift, thereby significantly improving operational workflows and reducing downtime for the “Pado” platform.
- Leveraged Kubernetes orchestration to efficiently manage containerized applications, ensuring high resource utilization, scalability, and resilience across diverse deployment environments, which facilitated seamless application scaling and high availability.
- Implemented robust Single Sign-On (SSO) from Knox Portal (Internal Samsung EMP) by using Key cloak for all user related actions (token, session etc) and integrating securely with internal systems and third-party tools such as Kubeflow, Grafana, Jupyter notebooks, and Docker, thereby enhancing security and user convenience.
- As a technical team leader, I managed six developers, overseeing projects, involving in designing (architecting the features) , code reviewing and ensuring client satisfaction through effective communication and problem-solving(build in one cluster deploy in many, Mounting an external PV etc..)
- Travelled Onsite (Suwon, South Korea) for requirement gathering and POC’s on certain latest technologies and interacted with various solution providers on MLOPS and designing the “PADO Platform”, with client appreciation.
- Leveraging inhouse developed LLM usage in day-to-day work, including hosting the LLM in the platform using model
- Deploying, Maintaining and Debugging Production code following organization process structure with proper unit test case validation.

### Oracle Financial Services Software Ltd | Technical Staff Consultant

08/2021-02/2022

- Developer in “**Flex cube**” application: Banking application. Module wise code analysis and build the pl/sql package, functions and procedures.
- Developed and deployed patch’s for data-based fixes in production with PI/SQL cursors and SQL queries in production for the “Barclays Bank”

### Chubb International (Cognizant) | Programmer Analyst

02/2019-08/2021

- Developer in “**Masterpiece**” Application (Policy Builder Tool), Delivered Client required changes with Clean enthusiasm and technical knowledge.
- Developed the additional feature (Efficient Walk back handling code) required for the business and with my innovative knowledge suggested for improvement and future fixes.

### Agrainz Solutions | Trainee Software Engineer

02/2018-08/2018

- Intern for two products Agrainz and Zedua

## Education

---

MVJ College of Engineering | Information Science and Engineering | 2017

## Achievements

---

**Leding a team of 6 java developers (01/2024 - Present):** Java technical lead and associate team lead within organization for ensuring project milestones were met while maintaining high quality standards.

**CSR Event for Training about latest technologies:** Had been a part of CSR Event to teach +2 students about latest technologies in software industry and brief about it

**Award:**

- Best Trainer in Java (02/2023 - 12/2024) : Organization conducts technical trainings within technical teams.
- Doing the right thing, the right way (12/2020 - 12/2020): Received a award in Cognizant Organization for doing the right thing the right, for constant interaction with Client and implement necessary changes and suggestions
